DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4 and 8, drawn to a method and system for managing the delivery of goods using an original order information and an updated order information, classified in class 705, subclass 26.
- II. Claims 5-7, drawn to a computer program code that manages the delivery of goods by using original order information to generate updated order information, classified in class 705, subclass 26.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a method and system for managing the delivery of goods that does not require generating updated order information from the original order information as required in invention II.

See MPEP § 806.05(d).
